Carrie,

Thank you for your message and for attending the meeting Tuesday night.

Attached is a copy of the RI/FS boundary map and slide of the Superfund stepping stone process and where the CFAC timeline fits. I have also attached the fact sheet about the Superfund Alternative approach that we discussed in the presentation.

I am including Kai Elgethun in my response. He delivered the presentation from the Agency for Toxic Substances and Disease Registry. I do not have a copy of his presentation. He may be able to assist you.

At the meeting, we also showed a few sampling maps. These maps are too large to send by email but they can be accessed from our website. I've included a link directly to the work plan where the maps are embedded. This document is large (511 pp, 158 MB) and the maps are on pages 154 – 161. (RI/FS for CFAC online: <https://semspub.epa.gov/src/document/08/1719918>)

Let me know if you have any trouble accessing these documents and if I can be of further assistance to you. Thanks again for your participation Tuesday night.

Hi Robert and Mike,

Thank you for the public meeting yesterday in Columbia Falls, MT. Can you send me copies of the presentations, if they are available?

Thank you,
Carrie Eklund
